

SAGHAR MEHMOOD

AI/ML Engineer · Backend AI Developer · Software Engineer

Islamabad, Pakistan | 0370-9361668 | [linkedin.com/in/saghar-mehmood](https://www.linkedin.com/in/saghar-mehmood) | github.com/SagharMehmood7860

SUMMARY

Artificial Intelligence Graduate with hands-on experience building end-to-end AI systems — from multimodal deep learning pipelines to production Flask APIs and mobile frontend. Strong background in CNN/LSTM-based classification, EEG bio signals processing, computer vision, and full-stack AI deployment. Looking for an AI/ML engineering or backend AI role where I can contribute technically from day one.

EDUCATION

B.S. Artificial Intelligence — PMAS Arid Agriculture University Rawalpindi

May 2026

Relevant coursework: Machine Learning, Deep Learning, Computer Vision, Signal Processing, Database Systems

TECHNICAL SKILLS

Languages:	Python, JavaScript (ES6+)
AI / ML:	TensorFlow, Keras, Scikit-Learn, CNN, LSTM, GRU, XGBoost, DeepFace
CV & Signal:	OpenCV, Facial Landmark Detection, EEG Band Analysis ($\alpha/\beta/\gamma/\theta/\delta$), Librosa, MFCC
Backend:	Flask, REST API Design, SQL Server (SSMS)
Frontend:	React Native
Tools:	GitHub, Postman, FFmpeg, Pandas, NumPy, VS Code, PyCharm

PROJECTS

Multimodal Lie Detection System

Final Year Project · 2025 – 2026

Python · TensorFlow · Keras · Flask · React Native · OpenCV · DeepFace · SQL Server · Librosa · FFmpeg

- Engineered an end-to-end multimodal AI system that fuses EEG biosignals, facial expressions, and speech features for real-time deception detection
- Trained and ensembled CNN, LSTM, GRU, and XGBoost classifiers across three independent data modalities, comparing single-modal vs. fused prediction accuracy
- Processed EEG frequency bands (Alpha, Beta, Gamma, Theta, Delta) using SciPy filtering; extracted MFCC and chroma speech features with Librosa for audio classification
- Integrated DeepFace and OpenCV to build a real-time facial landmark detection and emotion recognition pipeline feeding the fusion model
- Developed Flask REST APIs connecting a React Native mobile frontend to a SQL Server backend, with synchronized video/EEG/audio recording via FFmpeg

CORE AREAS

Deep Learning · Multimodal AI Systems · Computer Vision · EEG Signal Processing · Backend API Development · Full-Stack AI Deployment · ML Model Training & Evaluation

Languages: English (Professional) · Urdu (Native)
